

K LOVE radio is one of the most important aspects of my life. It is the most uplifting radio station out there for Christians and I listen to it all day every day. My children and grandchildren listen to it all the time also. It has the most positive impact on my life and keeps my spirits up and lifted as I praise my God all day long. Music is how I express my love and praise for my God and it is something I could not do without. I listen at home, in the car and on my MP3 player as I walk my dogs every day.

I have many many friends that do the same and the impact on my city and community from K LOVE radio is so HUGE it is impossible to measure. People support this radio station around the world with their own money to keep it on the air and that should show you how BIG the impact on this world is from K LOVE radio. If this was taken away from us because of the FCC I can't even imagine the impact it would have on my life and the life of every Christian. This is a freedom that we enjoy and praise God for.

It can only be a possitive thing for the world to have this many people being uplifted every day by this radio station. It is a positive and uplifting thing for any person to hear this music being played 24 hours a day wherever you are and isn't that what this world needs where we are right now.

Please don't change the way things are. Please allow K Love to continue to be broadcast as it has been. God will be lifted up and praised and lives are changed every day by the impact of K Love radio. I live in the Denver metro area and it is on 91.1 FM.

Thank you for your consideration and I pray God will bless you. You should tune in in your area and give it a try.

God Bless You,  
Debbie Watson
